                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 229

US-09-21

US-09-21

Sequence 21, Application US/09365029

Patent No. US20010021772A1

GENERAL INFORMATION:
APPLICANT: UHLMANN, Bugen
APPLICANT: PETWAN, Anuschirwan
APPLICANT: PITCHANT: PITCHANT: PAPLICANT: POSSNER Richard D.
TITLE OF INVENTION: SHORT CLIGONUCLECTIDES FOR THE INHIBITION OF VEGF
TITLE OF INVENTION: EXPRESSION
FILE REFERENCE: 2608/3208
CURRENT APPLICATION NUMBER: US/09/365,029
CURRENT APPLICATION NUMBER: EP 98114853.9
EARLIER PILING DATE: 1998-08-02
SEALIER PILING DATE: 1998-08-07
NUMBER OF SEQ ID NOS: 94
SOFTWARE: PATENTIN OF 21
LENGTH: APPLICATION NUMBER: PATENTING DATE: LIBRICA DATE: DATE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       TYPE: DNA

Publication No. US20040142335A1

GENERAL INFORMATION:

APPLICANT: Petersohn, birk

APPLICANT: Conradt, Marcus

APPLICANT: Hofmann, KAY

TITLE OF INVENTION: METHOD FOR DETERMINING SKIN STRESS OR SKIN AGEING IN VITRO

FILE REFERENCE: HENK-0041

CURRENT APPLICATION NUMBER: US/10/450,797

CURRENT PILING DATE: 2003-12-04

FRIOR FILING DATE: 2001-11-220

FRIOR FILING DATE: 2001-01-03

NUMBER OF SEQ ID NOS: 1435
